### Miami Area Employment-October 2014

Total nonfarm employment for the Miami-Fort Lauderdale-Pompano Beach Metropolitan Statistical Area stood at 2,440,700 in October 2014, up 76,600, or 3.2 percent, over the year, the U.S. Bureau of Labor Statistics reported today. Nationally, employment increased 2.0 percent from October 2013 to October 2014. Regional Commissioner Janet S. Rankin noted that over-the-year employment gains in the local area extended back to August 2010. (See [chart 1](#) and [table 1](#); the [Technical Note](#) at the end of this release contains metropolitan area definitions. All data in this release are not seasonally adjusted; accordingly, over-the-year analysis is used throughout.)

**Chart 1. Total nonfarm employment, over-the-year net change in the Miami metropolitan area and its divisions, October 2009-October 2014**

Source: U.S. Bureau of Labor Statistics.

The Miami area is made up of three metropolitan divisions—separately identifiable employment centers within the larger metropolitan area. All three divisions gained jobs over the year. Miami-Miami Beach-Kendall, the largest of the three divisions with 45 percent of the area's employment, added 37,800 jobs from October a year ago. The Fort Lauderdale-Pompano Beach-Deerfield Beach division which accounted for 32 percent of Miami's workforce, added 24,000 jobs. The West Palm Beach-Boca Raton-Boynton Beach division, with 23 percent of the workforce, added 14,800 jobs over the 12-month year period.

## Industry employment

In the Miami metropolitan area, the trade, transportation, and utilities supersector experienced the largest employment increase, up 20,600 or 3.7 percent from October a year ago. This job growth was concentrated in the Miami and Fort Lauderdale metropolitan divisions. Nationwide, employment in this industry grew 2.2 percent over the 12-month period. (See [chart 2](#).)

Professional and business services had the second largest over-the-year increase in jobs locally in October 2014, growing by 13,800 or 3.7 percent. All three metropolitan divisions added jobs from October a year ago. Nationwide, professional and business services employment increased 3.6 percent during the same period.

**Chart 2. Total nonfarm and supersector employment, over-the-year percent change, United States and the Miami metropolitan area, October 2014**

Source: U.S. Bureau of Labor Statistics.

Education and health services added 10,500 jobs in October 2014, an increase of 3.0 percent over the year, with all three metropolitan divisions gaining jobs. Nationally, employment in this industry grew 2.1 percent since October 2013.

Two other supersectors gained at least 7,000 jobs over the year in the local area—construction (8,200) and leisure and hospitality (7,300). Four other supersectors recorded over-the-year employment gains ranging from 5,800 to 3,000 in October 2014.

## Twelve largest metropolitan areas

Miami was one of the nation's 12 largest metropolitan statistical areas in October 2014. All 12 areas experienced over-the-year job growth during the period, with 5 exceeding the national average of 2.0 percent. The fastest rate of job growth was registered in Houston-Sugar Land-Baytown, up 4.3 percent, followed by Dallas-Fort Worth-Arlington, at 3.6 percent. The slowest rates of job growth were in Philadelphia-Camden-Wilmington (0.3 percent) and Detroit-Warren-Livonia (0.4 percent). (See [chart 3](#) and [table 2](#).)

The New York-Northern New Jersey-Long Island area added the largest number of jobs, 123,900, since October 2013. Two other metropolitan areas gained more than 100,000 jobs over the year—Houston (120,600) and Dallas (111,900). Two areas added fewer than 10,000 jobs over the year—Philadelphia (9,100) and Detroit (6,900).

Two supersectors accounted for most of the job growth in the 12 largest areas. Professional and business services led employment growth in five metropolitan areas: Boston-Cambridge-Quincy, Chicago-Joliet-Naperville, Dallas, Los Angeles-Long Beach-Santa Ana, and San Francisco-Oakland-Fremont. (See [table 2](#).) Trade, transportation, and utilities recorded the largest gains in four areas: Atlanta-Sandy Springs-Marietta, Detroit, Miami, and Philadelphia.

Over the year, manufacturing recorded the largest loss of jobs in three areas—Chicago, Dallas, and Los Angeles. Information lost the most jobs in two areas—New York and Washington. Houston and Miami experienced no annual job loss in any supersector.

## Technical Note

This release presents nonfarm payroll employment estimates from the Current Employment Statistics (CES) program. The CES survey is a Federal-State cooperative endeavor between State employment security agencies and the Bureau of Labor Statistics.

**Definitions.** Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2012 version of the North American Industry Classification System.

**Method of estimation.** The employment data are estimated using a "link relative" technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for approximately 39 percent of CES published series which have insufficient sample for direct sample-based estimates.

**Annual revisions.** Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

**Reliability of the estimates.** The estimates presented in this release are based on sample survey and administrative data and thus are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding.

**Employment estimates.** Measures of sampling error for state CES data at the supersector level are available on the BLS Web site at [www.bls.gov/sae/790stderr.htm](http://www.bls.gov/sae/790stderr.htm). Information on recent benchmark revisions for states is available at [www.bls.gov/sae/](http://www.bls.gov/sae/).

**Area definitions.** The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget, dated December 1, 2009. A detailed list of the geographic definitions is available at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

**The Miami-Fort Lauderdale-Pompano Beach, Fla., Metropolitan Statistical Area** includes the counties of Broward, Miami-Dade, and Palm Beach in Florida.

- The Fort Lauderdale-Pompano Beach-Deerfield Beach, Fla., Metropolitan Division includes Broward County in Florida.
- The Miami-Miami Beach-Kendall, Fla., Metropolitan Division includes Miami-Dade County in Florida
- The West Palm Beach-Boca Raton-Boynton Beach, Fla., Metropolitan Division includes Palm Beach County in Florida.

## **Additional information**

More complete information on the technical procedures used to develop these estimates and additional data appear in Employment and Earnings, which is available online at [www.bls.gov/opub/ee/home.htm](http://www.bls.gov/opub/ee/home.htm). Industry employment data for states and metropolitan areas from the Current Employment Statistics program are also available in the above mentioned news releases and from the Internet at [www.bls.gov/sae/](http://www.bls.gov/sae/).

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: (202) 691-5200; Federal Relay Service: (800) 877-8339.
